Tenure-Stream Position in Biostatistics - U of Toronto

The Dalla Lana School of Public Health at the University of Toronto is seeking outstanding candidates for a tenure-stream position within the Division of Biostatistics, at the rank of Assistant or Associate Professor. The starting date is negotiable, with Sept. 1, 2009, as the earliest possible. Applications will be accepted until the position is filled.

Candidates should have a PhD or equivalent in biostatistics, statistics, or related quantitative field. Interests in the development of biostatistical methods, in applied collaborative research, and in graduate training, are expected. Individuals from all areas of biostatistics are encouraged to apply, including Bayesian methods, bioinformatics, clinical trials, data mining, environmental statistics, genetics/genomics, longitudinal data analysis, spatial analysis and survival analysis.

The School is situated within a large health-science research complex, and has alliances with many internationally renowned research institutes/centres and teaching hospitals. The Division of Biostatistics enjoys an essential role in this vibrant, multi-disciplinary research environment, and has strong ties to other academic units within the University. For more information, please visit the School’s website at www.sph.utoronto.ca.

Applicants should submit a letter of introduction, including a statement of current and future research interests, and a curriculum vitae by mail or email to: Amy Baier, Executive Assistant to the Director, Dalla Lana School of Public Health, 155 College Street, Toronto, Ontario, M5T 3M7, Canada (amy.baier@utoronto.ca).

All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority. The University of Toronto is strongly committed to diversity within its community and especially welcomes applications from visible minority group members, women, Aboriginal persons, persons with disabilities, members of sexual minority groups, and others who may contribute to the further diversification of ideas.
