

Sep 10, 2014 Actuarial Course Announcements (for ACT349)

ACT349 Prereqs:

Please let your students know that those who do not have the minimum grade of 63 in ACT240, 245 and 247 will be removed from the class at the end of next week. That requirement is strict, and the only waiver is if they have passed ACT240 and ACT245 but got less than 63 but they have passed FM. There is no waiver for ACT247.

ACT473H not required

The current online calendar mistakenly indicates that ACT473H is a required course for the specialist program in actuarial science. Please let your students know that ACT473H is not a required course for the program at this time.

Also, let them know that ACT473H will be offered next term (open to 3rd and 4th year students).

Enrolment in that course requires permission of the department. Let students know that if they wish to enrol in ACT473H, they must contact me by e-mail.

Professor of Actuarial Science

ACT470H Pensions

For the past few years, in alternate years, we have offered a pension math course (ACT470H, previously called ACT471H in error) in the second term. The instructor, Howard Lyons, is willing to teach the course again next term if there is enough interest. The course is open to students who have completed ACT348. Please let the students know and ask them to contact me if they are interested in the course.
