

**Postdoctoral Fellow Position in Statistical Genetics**  
**University of Toronto**

A postdoctoral position is available in the Department of Statistical Sciences, the University of Toronto, St. George Downtown Campus. The post-doctoral fellow will develop statistical methods and computational tools for genetic studies of complex human traits. The University of Toronto, and its proximity to a number of world-class research hospitals, provides a unique cross-disciplinary training environment in statistical genetics.

The successful applicant must have a Ph.D. in Biostatistics or Statistics with specialty related to statistical genetics and excellent programming skills. Applicants should also have excellent written and verbal communication skills.

The position is available immediately with competitive salary and benefits. The duration of the appointment is 1-2 years, depending on the candidate's goals and productivity.

Potential applicants should submit their cover letter including a research statement, curriculum vitae and names of two references to

Professor Lei Sun
